

# Deploy the market-leading management platform for Cisco Meeting Server – and the only one that supports two-factor authentication (2FA)

VQ Conference Manager is the only management platform for Cisco Meeting Server that supports two-factor authentication.

It integrates with your SAML 2.0 system, delivering the enhanced levels of security you require, via Okta, Duo and OneLogin single-sign-on

## Proven in US federal agencies and used in the Department of Defense

---

VQ Conference Manager has been successfully deployed in United States federal agencies, and is operational in the Department of Defense.

And as a fully on-premises installation, VQ Conference Manager sits inside your firewall for optimal control and security.

“ To make the magic of Cisco Meeting Server happen, you need an easy way to configure and manage it. That’s what VQ Conference Manager does. And that’s why I’d put VQ Conference Manager into every Cisco Meeting Server deployment we do. ”

Erik Nielsen | Engineering Manager  
East & Federal Collaboration

## You're in control

The conference-control dashboards pull together the real-time call information your operations team needs to sustainably oversee large numbers of calls.

You can also provide fully managed, 'white-glove' services to selected users, similar to what you may have provided in the past.

## Measure results

Comprehensive analytics provides all the data you need to understand how your Cisco Meeting Server conferencing is being used.

Demonstrate return on investment, identify where improvements are required, and plan ahead for growth.

## Accelerate deployment and drive adoption

VQ Conference Manager provides a single interface to provision, configure and manage your conferencing service. From here, you can:

- Set up automated user provisioning from Active Directory
- Create of different types of meeting
- Configure secure meetings with one-time access passcodes

In addition, VQ Conference Manager's comprehensive suite of unified communications tools, plus templates that ensure consistent in-call experiences, are proven to drive exceptional levels of service usage.

### At-a-glance: VQ Conference Manager's unified communications tools

- Microsoft Outlook Add-in and Plug-in
- iPhone app
- Web-based user portal
- Blast Dial
- Elasticsearch/Kibana based Analytics
