

## Importing and managing video conferencing users

VQ Conference Manager streamlines user management, thanks to automation, templating, integration with LDAP/Active Directory and powerful tools to create bespoke services for different user groups

### LDAP/Active directory integration

---

VQ Conference Manager links with your central LDAP/Active Directory user management system to import video conferencing users to your Cisco Meeting Server(s)

Using your corporate master list of users minimizes the risk of manual data entry errors.

### High-speed provisioning

---

Automated process updates your video conferencing user list and creates end-points, end-point URIs e.g. Skype for Business clients and template-driven Spaces for every user

VQ Conference Manager's automated provisioning reduces the time to add each user from minutes to a few seconds, meaning you can sustainably scale to tens of thousands of users.

### Keep on top of moves and changes

---

You need to keep your video conferencing user list up-to-date at all times, especially as people join, move roles or leave

VQ Conference Manager enables this, by scheduled sync up with your corporate LDAP/Active Directory server.

### A service that works the way people expect

---

VQ Conference Manager uses LDAP data to configure your video conferencing service to work the way users will expect

This could include using existing extension numbers to dial in. By making video conferencing easy for people in this way, more will use your service, meaning you get higher returns on your investment.

## Bespoke services for different groups

---

Create multiple user groups or service tiers for each tenant on your video conferencing system

This enables you to offer each group a service tailored to its needs, while the pre-defined settings help deliver consistent in-call experiences that encourage increased usage of your service.

## Import data from existing Cisco Meeting Servers

---

Already got Cisco Meeting Servers or Acano Call Bridges set up with tenants and LDAP configurations?

This could include using existing extension numbers to dial in. By making video conferencing easy for people in this way, more will use your service, meaning you get higher returns on your investment.

## Address LDAP data issues

---

LDAP data isn't always perfect. VQ Conference Manager helps you improve it

Comprehensive logs and error messaging enable you to identify where your corporate data needs to be improved, to help you deliver a high-quality video conferencing service.
