

## Why you need a proven, enterprise-grade management platform for Cisco Meeting Server

Enable your video conferencing service to grow sustainably from small to very large, using the leading management platform for Cisco Meeting Server

### Minimize risks

Cisco Meeting Server represents a significant investment. Why risk its success by building your own management tools or using a first-generation management platform?

VQ Conference Manager is now in its third generation on Cisco Meeting Server, and underpins large numbers of services, including at some of the world's biggest users of video conferencing.

### Accelerate CMS deployment

Take advantage of automation and an optimized user interface to speed up rollout of your video conferencing service

VQ Conference Manager integrates with your existing Active Directory/ LDAP system and cuts the time taken to provision a user from several minutes to a few seconds. This means your organization can enjoy the benefits of Cisco Meeting Server more quickly than if you provision manually.

### Think long-term

Successful video conferencing services grow. You need to choose tools that are proven to support your long-term journey

Having to change your video conferencing management platform will be expensive and disruptive. Avoid this unnecessary cost by choosing VQ Conference Manager, a platform that has helped dozens of customers grow video conferencing services from small to very large.
